

Student Energy Chapter at Masaryk University – Activities Overview (Q3–Q4 2025)

September 2025 – Professional Field Visit to PRE (Electricity Provider)

The chapter organized a professional visit to **Pražská energetika (PRE)**, one of the key electricity providers in the Czech Republic. The visit included:

- an introduction to PRE's role in the national energy system,
- discussions on **career opportunities** in the energy sector,
- a guided **site visit** of the facilities and surrounding infrastructure.

The activity involved approximately **12 students**, including international participants, contributing to cross-cultural exchange and exposure to real-world energy operations. The visit strengthened the link between academic study and energy industry practice.

October 2025 – Student Energy Outreach at University Associations Day

We participated in the **University Campus Day of Student Associations**, hosting an outreach stall aimed at increasing awareness and recruiting new members. Activities included:

- presenting the **mission, values, and global story of Student Energy**,
- introducing students to opportunities for engagement in the energy transition,
- direct interaction with students from various disciplines.

The event served as a key visibility and networking opportunity, supporting chapter growth and awareness-raising within the university community.

November 2025 – Online Expert Talk on the LNG Market

1. The chapter organized an **online discussion and presentation** led by an energy professional based in **Dubai**, focusing on the **global LNG market**. The session provided:

- insights into LNG trade dynamics and market developments,
- a practitioner's perspective on energy markets outside Europe,
- an interactive Q&A session with students.

The event enhanced students' understanding of global energy systems and professional pathways in the energy sector.

2. Student Energy members and energy enthusiasts participated in the **Central European Energy Conference 2025**, organized by the **Slovak Foreign Policy Association (SFPA)** in Bratislava. The conference provided:

- exposure to high-level discussions on energy security and energy transition in Central Europe,
- networking opportunities with policy experts, professionals, and regional stakeholders,
- practical insights into regional energy cooperation.

Participation demonstrated a high level of **member motivation and chapter impact**, with several participants traveling from their hometowns to a foreign country specifically to attend the conference recommended by the organisation team of the Chapter. This activity highlighted strong engagement beyond the university environment and reinforced the chapter's regional outlook.

December 2025 – High-Level Discussion on Climate Negotiations and CBAM

A face-to-face presentation followed by discussion was held with **Jan Havlík**, former **CBAM negotiator for the Czech Republic at EU institutions**. The session focused on:

- EU climate policy and international climate negotiations,
- the Carbon Border Adjustment Mechanism (CBAM),
- the role of institutions and negotiation processes in shaping climate agreements.

The event attracted approximately **25 participants** and featured a **high-profile speaker**, while also including a presentation of Student Energy and its activities. The session contributed significantly to policy-focused capacity building among participants.

Ongoing Activities – Social Media and Awareness Raising

Throughout Q3–Q4 2025, the chapter maintained **continuous activity on social media**, primarily via **LinkedIn**, focusing on:

- promoting chapter events and discussions,
- increasing visibility of Student Energy initiatives,
- raising awareness of energy transition topics among students and young professionals.
